PROFESSIONAL SUMMARY

An full-stack developer with a strong foundation in coding and a growing interest in building responsive, user-focused web applications, along with a basic understanding of AI concepts. Brings effective communication, teamwork, and problem solving abilities developed through academic projects and active extracurricular involvement.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton school of technology, Rishihood University	Grade: Pursuing
Intermediate (Class XII)	2022 - 2023
BDM international	Grade: 89.0%
Matriculation (Class X)	2020 - 2021
BDM international	Grade: 94.0%

PROJECTS

StayNear ([Github](#)) ([Demo](#)) May 2026

- It is a **full-stack student accommodation platform** built using **React.js, Node.js, Express.js, and MongoDB**.
- Implements **RBAC** system with secure **JWT authentication** for **Seekers, Owners, and Admins**.
- Enables **verified property listings**, where owners submit properties and admins review them before publication.
- Allows students to **search, filter, inquire** about accommodations based on location, price, amenities, and room type.
- Features an **Admin dashboard** for property verification, user management and platform moderation.

RepoInsight ([Github](#)) ([Demo](#)) April 2026

- Built an AI-powered GitHub portfolio analyzer using **Next.js, FastAPI, and LLMs** to deliver recruiter-style insights.
- Integrated **GitHub APIs to analyze repositories**, contributions, and tech stacks for meaningful evaluation.
- Developed an **interactive dashboard** with project insights, strengths/weaknesses, heatmaps and language charts.
- Enhanced performance with caching and shareable dynamic routes for fast, user-friendly portfolio reviews.

Medico ([Github](#)) ([Demo](#)) December 2025

- It is a full-stack healthcare management platform built using **React.js, Node.js, Express.js and MongoDB**.
- Implements a **RBAC** system, allowing secure separation of **User and Admin** roles with **JWT authentication**.
- Enables appointment booking, online medicine ordering with a mock payment system, and complete order tracking.
- Integrates a **real-time chatbot** powered by a API, helping users with queries and support within the application.

SKILLS

Computer Language: CSS, HTML, JavaScript, Python, SQL, TypeScript

Soft Skill: Communication Skills, Presentation Skills, Problem-Solving, Public speaking

Databases & Data Tools: MongoDB, NoSQL, PostgreSQL, Spreadsheet, Tableau

AI / ML: LangChain, LangGraph, LLM, Machine Learning

APIs & Testing: Postman

Cloud & DevOps: Git and Github

Frameworks & Libraries: Express JS, Next.js, Next JS, Node.js, NumPy, Pandas, Prisma ORM, React, Tailwind CSS

EXTRA-CURRICULAR ACTIVITIES

- I was a **core committee member at Neutron 2025**, where I managed the workshop department end-to-end.
- I have hands-on experience in **event management**, having organized various events at both school and college levels.
- I have actively been involved in various **public speaking and anchoring** which strengthened my presentation skills.
- I am a committee member **of several clubs** where I contributed to collaborative initiatives.
